Analysis results for year: 2013

(include state in PWSID no.
example: KY-9876543)

System: Jonathan Creek PWSID: KY0790216

System Manager: David Lovett Phone: (270) 354-8474

Title: General Manager

CCR Contact Person: David Lovett Phone: (270) 354-8474

(if different) Title: General Manager

System Population: 7,200 Water systems that sell to other water systems must provide data **no**
If no official population figures, multiply meters by 3.3 **later than April 1** each year. An alternate date must be specified by a
contract. Refer to instructions and Wholesale page.

Meeting Location: Jonathan Creek Water Office

Date(s) Board Normally Meet: 4th Tuesday of Month Time: 5:30pm

Mailing Address: PO Box 414 Benton, KY 42025

**Provide information about the source in the space below. Also, if you purchase from more than
one supplier identify each supplier and their service area. Example: Waterville (A) supplies water
to east side of county. Coleville (B) supplies water to Highway 128.**

In the area below insert information about the water source and a summary of the source water
assessment(s). Use as much of the available space as possible but do not overfill the area. Text can be
typed or copied into the cell. If unable to paste text directly into the cell, paste text in the formula bar at
the top. Condense lengthy source water assessments to fit available space.

Be sure to include information that will cover all six of the following items:

1. If you treat or purchase water (or combination of both) (name of system you purchase from)
2. Mention whether groundwater or surface water
3. Where water comes from (common name of lake, stream, etc. or wells)
4. The susceptibility to contamination rating (high, moderate, or low)
5. A summary of the potential contaminant sources
6. Where the complete source water assessment can be obtained or reviewed

Water Source and Assessment Summary: (all six of the above must be included in the summary paragraph)

Our water sources are two wells located close to our Water Treatment Plant. We do not purchase water
from any other source. These wells are classified as groundwater. The Kentucky Division of Water
determines this status. We treat and filter this ground water to remove Iron. An analysis of the overall
susceptibility to contamination of the Jonathan Creek water supply indicated that susceptibility is
moderate. Sources of impact include the agricultural activities, septic systems, Highway 68 and
underground storage tanks. This Susceptibility Analysis Report is available at the Purchase Area
Development District, 1002 Medical Drive Mayfield KY 42066, (270) 247-7171. This report is also available
through Jonathan Creek Water District, located at 7564 Highway 68 East, Benton Kentucky (270) 354-
8474. This report may also be obtained through Kentucky Division of Water, 14 Reilly Road, Frankfort,
Kentucky 40601 (502) 564-3410.
